EDUCATION AND SCHOLASTIC ACHIEVEMENTS

Program	Institute	% / CGPA	Year
B.Tech in Computer Science and Engineering	Karunya institute of technology and science, Coimbatore	7.95 / 10	2026
Class XII (CBSE)	Euro International School Kanina	90.4%	2021
Class X (CBSE)	Euro International School Kanina	93.8%	2019

RELEVANT COURSEWORK

- Database Management Systems
- Operating System
- Data Structures and Algorithms in C++
- Internet of Things
- Computer Networks
- Applied Programming Lab (Python)
- Cryptography
- Digital Systems Design and Lab
- Data warehousing and Data Mining
- Computer Organization
- Computational tools
- Microprocessor Theory + Lab
- Introduction to Data Science
- Machine Learning and techniques
- Natural Language Processing
- Probability and Statistics

Languages: Java, Python, C++, HTML, SQL, Matlab, R programming
Libraries: Keras, Numpy, Matplotlib, Scikit-Learn, TensorFlow, Streamlit
Practices and other Software: Object-Oriented Programming, Git

WORK EXPERIENCE

Intern at Sevenky Technologies Private Limited
June, 25 - July, 25

- **Developed Edge AI and TinyML models** for real-time data processing, contributing directly to the development of core application features and enhancing system efficiency.
- **Worked extensively on coding, testing, and data visualization**, gaining practical, hands-on experience across multiple stages of the development lifecycle.
- **Prepared comprehensive technical documentation** to support seamless project implementation, knowledge transfer, and future maintenance.
- **Recognized for diligence, hard work, and curiosity**, consistently providing valuable contributions to team progress and project success.

PROJECTS

Skin Disease Detection (YOLOv8)

- Developed a real-time detection pipeline using **YOLOv8** and **CNN**, achieving **90%+ accuracy** on a multi-class skin disease dataset including common skin conditions.
- Integrated **voice-output diagnosis** and **auto-generated PDF reports**, providing disease name, confidence score, symptoms, and suggested treatment for each detected case.
- Optimized **model inference on CPU**, improving **FPS by 30%** to enable smooth real-time detection for practical use.

Image Classification Model (CNN)

- Built an **Image Classification** model using CNN with Keras and TensorFlow, enhanced with multiple convolutional and max-pooling layers for better feature extraction.
- Mitigated overfitting through careful tuning and achieved classification accuracy of up to **95%** on test data.
- Deployed the trained model as an interactive Streamlit web app letting users upload and classify images in real time.

ShoppingGPT – AI-Based Shopping Assistant (NLP + Semantic Search + SQLite)

- Developed an **AI-powered shopping assistant** that allows users to search and interact with product information using natural language, providing intelligent and relevant responses.
- Implemented a **Python and Flask backend** with semantic routing, database integration, and vector-based similarity search to process queries and deliver accurate product and policy information.
- Built a **web interface using HTML and CSS** and managed the entire project using Git and GitHub, ensuring proper version control and project organization.

CERTIFICATIONS

Microsoft Azure Fundamentals

- Setting up and managing Azure resources, understanding the main services Azure offers, and ensuring everything is secure and compliant with regulations while gaining foundational knowledge in cloud computing concepts, Azure services, and solutions.

Cisco Computer Networks

- Computer networking concepts, including network architecture, protocols and services. Developed skills in configuring and managing network devices, such as routers and switches, to ensure optimal network performance, security and learned about IP addressing, routing protocols.

Cisco C Programming

- Writing, debugging, and optimizing C code for various applications. Understanding basic programming concepts like variables, control structures, functions and pointers.

Cisco Internet of Thing

- IoT devices like Arduino Uno and Raspberry Pi. Acquired skills in implementing and managing IoT real time models like fire detection alarm and fish feeding system using Arduino UNO.

POSITIONS OF RESPONSIBILITY

NSS Coordinator
June, 23 – April, 24

- Coordinated community service workshops, managing end-to-end planning, execution, and on-ground operations.
- Promoted events by contacting colleges via calls and emails, increasing registrations and participant reach effectively.
- Hosted programs across multiple platforms, ensuring smooth execution using modern event-management tools.

EXTRA-CURRICULARS

Football	Represented the district at the state level twice after winning zonal and district-level competitions.
Public Speaking	Anchoring, extempore, and event hosting experience.
