JAGMOHAN SINGH

B.Tech CSE Student | AI/ML & Edge AI Enthusiast | Python | Java | C++

nikhiltanwar822971@gmail.com | +91-9467196556 | Haryana, India | LinkedIn

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student at Karunya Institute of Technology and Science (CGPA: 7.95/10) with hands-on experience in AI/ML, Edge AI, TinyML, and full-stack Python development. Proven ability to build production-ready models — including YOLOv8-based real-time detection, CNN image classifiers, and NLP-powered applications. Actively seeking entry-level roles in software development, data science, or AI/ML engineering in India.

EDUCATION

B.Tech – Computer Science and Engineering *2022 – 2026*
Karunya Institute of Technology and Science, Coimbatore | **CGPA: 7.83 / 10**

Class XII (CBSE) *2020 – 2021*
Euro International School, Kanina | **90.4%**

Class X (CBSE) *2018 – 2019*
Euro International School, Kanina | **93.8%**

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, HTML, MATLAB, R
AI/ML & Libraries: TensorFlow, Keras, Scikit-Learn, NumPy, Matplotlib, YOLOv8, Streamlit
Domains: Machine Learning, Deep Learning, Computer Vision, NLP, Edge AI, TinyML, IoT
Tools & Practices: Git, GitHub, Flask, SQLite, Object-Oriented Programming, Data Visualization
Cloud: Microsoft Azure (Fundamentals Certified)

WORK EXPERIENCE

AI/ML Intern | Sevenky Technologies Pvt. Ltd. *Jun 2025 – Jul 2025*

- Developed Edge AI and TinyML models for real-time data processing, directly enhancing core application features and system efficiency.
- Performed end-to-end development tasks including coding, testing, and data visualization across multiple stages of the project lifecycle.
- Created comprehensive technical documentation for project implementation, knowledge transfer, and maintenance purposes.
- Recognized by management for diligence, curiosity, and consistent contributions to team productivity and project outcomes.

PROJECTS

Skin Disease Detection System | *YOLOv8, CNN, Python, OpenCV, PDF Generation*

- Built a real-time multi-class skin disease detection pipeline using YOLOv8 and CNN, achieving 90%+ accuracy on a diverse skin condition dataset.
- Integrated voice-output diagnosis and auto-generated PDF reports covering disease name, confidence score, symptoms, and treatment suggestions per detection.
- Optimized model inference on CPU, improving FPS by 30% to enable smooth real-time performance suitable for practical clinical use.

Image Classification Web App | *CNN, TensorFlow, Keras, Streamlit*

- Designed and trained a CNN-based image classification model with multiple convolutional and max-pooling layers, achieving up to 95% test accuracy.

- Applied regularization and hyperparameter tuning strategies to effectively reduce overfitting and improve model generalization.
- Deployed the model as an interactive Streamlit web application, enabling real-time image upload and classification by end users.

ShoppingGPT – AI-Based Shopping Assistant | *Python, Flask, NLP, SQLite, Semantic Search, HTML/CSS*

- Developed an NLP-powered shopping assistant allowing users to search and query product information using natural language with intelligent, context-aware responses.
- Implemented a Python-Flask backend with semantic routing, vector-based similarity search, and SQLite database integration for accurate product and policy retrieval.
- Built a responsive web interface using HTML and CSS; managed full project lifecycle using Git and GitHub with proper version control practices.

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) – Microsoft
Cloud computing concepts, Azure services (compute, storage, networking), security, compliance, and resource management on Azure.

Computer Networks – Cisco Networking Academy
Network architecture, IP addressing, routing protocols, and configuration of routers and switches for optimized network performance.

C Programming – Cisco Networking Academy
Core programming concepts in C: variables, control structures, functions, and pointers with emphasis on debugging and optimization.

Internet of Things – Cisco Networking Academy
Hands-on IoT implementation using Arduino Uno and Raspberry Pi; built real-time models including fire detection alarm and automated fish feeding system.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

NSS Coordinator | Karunya Institute of Technology and Science *Jun 2023 – Apr 2024*

- Coordinated community service workshops handling end-to-end planning, execution, and on-ground operations for 500+ participants.
- Drove outreach by contacting colleges via calls and emails, significantly increasing event registrations and participant reach.
- Hosted and anchored programs across multiple platforms, ensuring smooth execution using modern event-management tools.

EXTRACURRICULAR ACTIVITIES

Football: Represented the district at the state level twice after winning zonal and district-level competitions.
Public Speaking: Experience in anchoring, extempore speaking, and event hosting at college-level programs.
