JAGMOHAN SINGH

jsingh822971@gmail.com | +91-9467196556 | Haryana, India | LinkedIn | GitHub

PROFILE

Computer Science graduate (B.Tech, 2026) with hands-on experience in software development, machine learning, computer vision, and edge computing. Proficient in C++, Python, and SQL with a strong foundation in Data Structures & Algorithms, OOP, and problem-solving. Experienced in developing, testing, optimizing, and deploying real-time applications through an AI/ML internship and end-to-end projects.

TECHNICAL SKILLS

Programming: C++, Python, SQL
Core CS: Data Structures & Algorithms, OOP, Computer Networks, DBMS
Machine Learning: Machine Learning, Deep Learning, Computer Vision, CNN, YOLOv8, Scikit-Learn
Libraries/Frameworks: TensorFlow, Keras, OpenCV, Streamlit, Flask
Tools: Git, GitHub, SQLite, Microsoft Azure
Other: Model Optimization, Inference Optimization, Data Visualization

EXPERIENCE

AI/ML Intern — Sevenky Technologies Pvt. Ltd. *Jun 2025 – Jul 2025 | India*

- Developed and tested Edge AI and TinyML models for real-time data processing, contributing to application features and inference efficiency.
- Worked across coding, testing, data processing, and visualization stages of the development lifecycle.
- Analyzed model outputs and performance to support optimization of real-time processing workflows.
- Created technical documentation covering implementation details, usage, and maintenance procedures.

PROJECTS

Skin Disease Detection System *2025*

YOLOv8, CNN, Python, OpenCV

- Built a real-time multi-class image detection system using YOLOv8 and CNN-based computer vision techniques, achieving 90%+ accuracy on the project dataset.
- Implemented webcam and image-based inference using Python and OpenCV for real-time disease detection.
- Integrated voice output and automated PDF report generation containing detected disease, confidence score, symptoms, and recommendations.
- Optimized CPU inference performance, improving FPS by approximately 30% for smoother real-time processing.

Image Classification Web App *2024*

CNN, TensorFlow, Keras, Streamlit

- Designed and trained a CNN-based image classification model using convolutional and max-pooling layers, achieving up to 95% test accuracy.
- Applied regularization and hyperparameter tuning to reduce overfitting and improve model generalization.
- Built and deployed an interactive Streamlit application supporting real-time image upload and classification.

EDUCATION

Karunya Institute of Technology and Science — Coimbatore *2022 – 2026*

B.Tech – Computer Science and Engineering | CGPA: 7.91/10

Euro International School — Kanina, Haryana *2020 – 2021*

Class XII (CBSE) | 90.4%

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) — Microsoft
- Computer Networks, C Programming, Internet of Things — Cisco Networking Academy

LEADERSHIP & EXTRACURRICULAR

- **NSS Coordinator**, Karunya Institute of Technology and Science (Jun 2023 – Apr 2024): Coordinated community-service workshops involving 500+ participants and supported outreach and event execution.
- **Football:** Represented the district at state-level competitions twice after qualifying through zonal and district competitions.
- **Public Speaking:** Anchoring, extempore speaking, and event hosting at college-level programs.
